Overview

The International Master Program in Biomedical Sciences (IMBS) is a joint program between Universidad de Buenos Aires in Argentina (Faculty of Pharmacy and Biochemistry and Faculty of Medicine) and Albert-Ludwigs University of Freiburg in Germany. It is supported by the DAAD (German Federal Institution for Academic Exchange) and private philanthropy. The aim of this program is to provide scientific knowledge and state-of-the-art experience to current and emerging biomedical research areas with a focus on translational research and development.

The IMBS lasts two years and it is held in English. The academic year starts in February. The first 7 months are carried out at Universidad de Buenos Aires. The following 5 months take place in Freiburg including intensives courses, special lectures and laboratory practice. Upon successful completion of the module courses in Buenos Aires and in Freiburg, the students will receive a Diploma of Advanced Studies (DAS) of each University. The last twelve months are dedicated to the Master Thesis Research which can be done either in Buenos Aires or in Freiburg. The students then defend their thesis and are awarded with the Degree Master of Science of Universidad de Buenos Aires and Degree of Advanced Studies (DAS) of Albert-Ludwigs University of Freiburg. Good to excellent results after the first year qualify for admission to a three-year doctoral project in one of the participating research groups.

The program is open to students from all over the world who hold a four-year Bachelor’s degree (or equivalent degree) in biosciences, biochemistry, biology, medicine, or related fields. Admission is only possible to the first segment of the program, not directly to the PhD program.

Program Structure

In Buenos Aires

- Module I: Biological Oxidations and Bioenergetics
- Module II: Biochemistry and Molecular Biology
- Module III: Physiology, Pharmacology and Toxicology
- Module IV: Microbiology, Virology and Immunology
- Module V: Neurobiology
- Module VI: Cellular and Molecular Pathology
- Module VII: Clinical Medicine
- Module VII: Molecular Oncology

In Freiburg

Module IX: Methodology workshops, Seminars and Conferences,
1. Molecular & Cellular Biology
2. Immunology and Pathology
3a. Pharmacology & Toxicology
3b. Molecular Cardiology
3c. Molecular Oncology
3d. Genetics of Disease and Cancer
4a. Materials & Microsystems for Life Sciences
4b. Biostatistics
4c. Bioethics
5. Laboratory Research 1 & 2

Freiburg

Freiburg is one of the most popular cities in Germany. It is located on the slopes of the Black Forest and is the sunniest city in Germany. Freiburg is a famous center of academics and research. As one of the oldest universities in Germany, the Albert-Ludwigs University of Freiburg (ALU) celebrated its 550 year anniversary in 2007 and is one of Germany’s most prestigious and leading research as well as teaching institution in Europe.

The University Medical Center Freiburg enjoys an excellent international reputation due to world-class medical treatment and extensive clinical research.

Buenos Aires

Buenos Aires is the capital of Argentina, the country’s largest city and the third largest city in Latin America. Located on the shores of Río de la Plata, Buenos Aires has always been an open-hearted city. It is a modern, dynamic and radiant city which features the European architecture of its founder. Buenos Aires enjoys a perennial mild climate. It has an intense cultural life where tango, coffee kitches and football (soccer) are essential in its people’s daily life.

The University of Buenos Aires (UBA) was founded in 1821. At present, it represents a well-known and prestigious institution for the training of professionals with over 6650 teachers and more than 100,800 students divided into 13 faculties. Within the fields of science and technology, the University of Buenos Aires has an outstanding structure made up of around 6000 researchers and scholars and over 1500 ongoing research projects financed by the University, the National Agency of Science and Technology, the CONICET, and other organizations.

The exchange of foreign researchers, teachers and students and the design of projects of common interests are some of UBA’s main aims.
