Abstract:

Dear josha-journal readers, The year is ending, and josha-journal presents itself with a bulging basket of top-class contributions. First, we would like to point out another winner of a Demetrios award. Nadine Bleile won the prize in the Master category with her paper “Turning Point Motherhood”. It deals with the socially relevant question of how women can combine work and family. Also receiving a Demetrios award was Elena Greta Falcini for her work on art and artificial intelligence. Our focus on medicine is strongly represented this time by neuroscientist Pernille Bülow's contributions on psychological topics and especially on cancer research with contributions from Sina Reis, Michelle P. Peñaherrera and Carlos A. López. A topic on which there can never be enough research. We wish all our readers a good read. Stay tuned to us.

Dear josha-journal readers,

The year is ending, and josha-journal presents itself with a bulging basket of top-class contributions. First, we would like to point out another winner of a Demetrios award. Nadine Bleile won the prize in the Master category with her paper "Turning Point Motherhood". It deals with the socially relevant question of how women can combine work and family. Also receiving a Demetrios award was Elena Greta Falcini for her work on art and artificial intelligence.

Our focus on medicine is strongly represented this time by neuroscientist Pernille Bülow's contributions on psychological topics and especially on cancer research with contributions from Sina Reis, Michelle P. Peñaherrera and Carlos A. López. A topic on which there can never be enough research.

We wish all our readers a good read.

Stay tuned to us.
