Humanities and Arts**

JOSHA is a service that helps scholars, researchers, and students discover, use, and build upon a wide range of content

JOSHA – Journal of Science Humanities and Arts

Table of Contents Vol 2, No 2

This new issue of the JOSHA Journal contains again a number of interesting articles covering the broad field of human research, discovery and creativity and, as a special topic, “International Cooperation and Mentoring” in academic institutions. The field of **Arts** is addressed by two wonderful papers, addressing art in the northern provinces of the Roman Empire as well as the creativity of a living artist. Aspects of **Philosophy, Ethics and Law** are studied in the paper on the philosopher Spinoza and his cultural and religious environment. In **Life Sciences** a fundamental process of the effect of human growth factor application to epidermal growth factor biology is studied. In the **Medicine** section a hallmark reading list is provided by Nobel Laureate Harald zur Hausen extending his prior research on the role of viruses in human diseases, while I develop a model of cancer as an evolutionary disorder, “evolution gone awry”.

The editors hope that our readers will enjoy reading these important contributions.

Roland Mertelsmann for the Editors of JOSHA.

SPECIAL TOPIC

International Cooperation and Mentoring: An Academic Obligation? Current Trends in the Internationalization of Higher Education

Federico Vasen

DOI: 10.17160/josha.2.2.26
